How A.I. can enhance your fiction writing

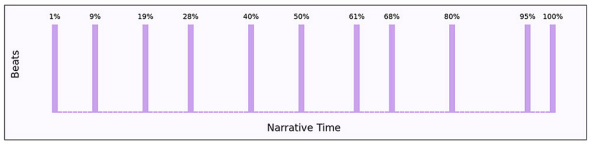

What is is

A new artificial intelligence called Marlowe, created by a team of authors and data scientists, provides authors with a detailed 26-page critique of their manuscripts within minutes, starting at $9.95 to $29.95.

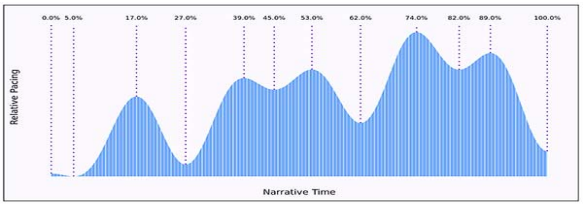

Plot structure

The A.I. report assesses your book's narrative art and plot structure, identifying major action scenes, plot turns, reversals and key revelations, with insights into where they should occur.

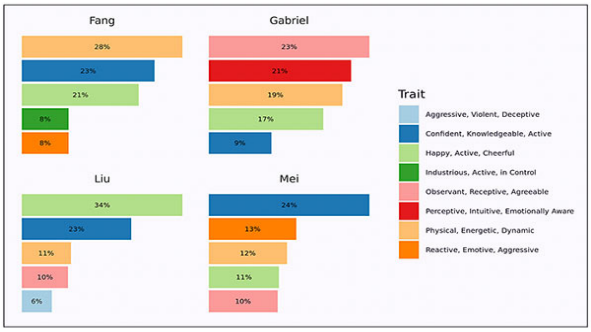

Story beats

The A.I. looks at your story's rhythm to see if major scenes are spaced out at regular intervals.

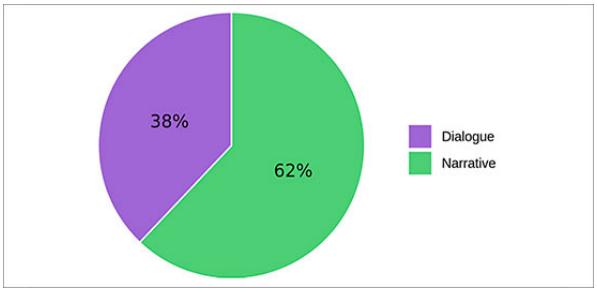

Pacing

The A.I. indicates peaks and valleys – the spots where readers are turning the pages quickly or slowly.

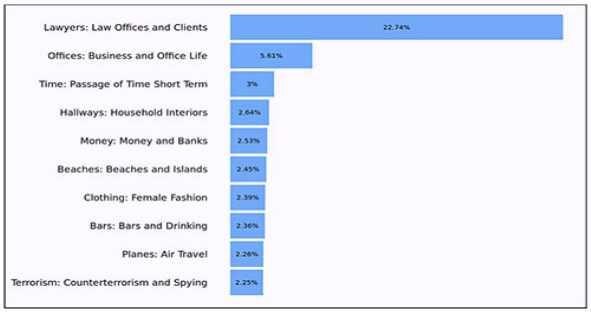

Character traits

The A.I. evaluates the traits of your major characters based on their actions. Is your hero too passive or your villain not evil enough?

Dialogue vs. narrative

The analysis breaks down the ratio of dialogue vs. narrative and points out the sweet spot.

Subject matter

The A.I. breaks down your novel's subject matter and offers tips on best practices.

PLUS: Cliche finder, repetitive words, overused adverbs & adjectives, explicit words and more.
